Tree Cap Puller – Overshoot Tool

Engineered Tooling Solutions *FAST*

The TMT Tree Cap Puller – Overshoot Tool. The Tree Cap Pulling tool is designed to facilitate the removal of a FMC internal tree cap installed on the GDA-01 Christmas Tree. The tool is to be deployed on drill string and is landed on the top of the Christmas tree. The ROV operated segments deploy under tree cap. Segments are retained by latching plates, these latch under their own weight and are held in place by friction.

Construction is by way of steel plate and bolted structural members.

The Tool can be easily modified to suit the client's specifications as required.

Features:

- Corrosion resistant
- Simple design
- ROV operated
- Field proven
