

The TMT Class 4 to 5 straight adaptor enables the use of a class 4 torque tool in a class 5 ISO receptacle; the tool provides a straight through drive size adaptation, without significantly affecting the torque output.

The TMT Class 4 to 5 adaptor allows two separate output interfaces to be manipulated by using only one Torque Tool. When coupled with a TMT Smart Torque Tool Mk2, greater accuracy and control is achieved.

Features:

- Easy installation and removal
- Field proven
- ISO 13628-8 compliant
- Lightweight and compact design
- ROV deployable

Specifications:

- | | |
|-------------------------|---------------------|
| • Overall Dims | 508L x290W x508H mm |
| • Weight in Air | 21 kg |
| • Weight in water | 15 kg |
| • Max. operation torque | 3500 Nm |
| • Input interface | ISO Class 4 |
| • Output interface | ISO Class 5 |
| • Depth rating | Unlimited |
