

The TMT Single Port High Flow ISO Hot Stab is a standardised hot stab conforming to ISO / API design requirements. This hot stab is typically used in applications where a higher hydraulic flow is required such as BOP intervention. TMT can also customise a hot stab to suit your needs ranging in size and types from a blank hot stab, a female hot stab or one with multiple ports. Compatible with ISO 13628-8 / API 17H, Type A & B receptacles.

TMT can configure the tool to the customer requirements.

### Features:

- Different handle options
- 2205 stainless steel
- Multiple accessories
- 10,000psi
- Pressure balanced

### Specifications:

- |                      |                    |
|----------------------|--------------------|
| • Overall Dimensions | 580L x153W x57Hmm  |
| • Weight in Air      | 3kg                |
| • Pressure           | 10,000psi (690bar) |
| • Flow               | 50L/min            |
| • Depth Rating       | Unlimited          |
